

# Quick Start Chart

## Phase 1

### Achieve Optimal Health with the Medifast® 5 & 1 Plan

Eat any 5 Medifast Meals each day (shakes\*, oatmeal, soups, chili, drinks, puddings, bars, and much, much more), plus one low-calorie Lean & Green Meal - limit 1 Maintenance Bar per day.

\* Medifast 55 Shakes are recommended for women, not currently exercising.  
Medifast 70 Shakes are recommended for men and physically active women.

**Cost of Medifast Meals per day?** Approximately \$11.00 per day, or equal to or less than your average daily cost of groceries!

## ✓ Checklist for Success

- Write your goals, commit to them, take action, and stay focused.
- Plan your day.
- Eat 5-6 meals each day.
- Start your day with a Medifast breakfast within 1 hour of waking.
- Select any of the Medifast Meals.
- Maximum of 1 Maintenance Bar per day.
- Drink 6-8 glasses of water each day. No alcohol.
- If you're not currently exercising, don't begin a new program for the first few weeks of weight loss.
- If you're currently exercising, you may continue but listen to your body.
- Once your body adapts, you can gradually build back up.
- Call your Health Coach when your products arrive.
- READ THE QUICK START GUIDE!

Ask your Health Coach about upcoming informational seminars.

Body Mass Index (BMI) is the measure of health and fitness endorsed by the Surgeon General of the United States. It takes into consideration the height and weight of a person to give an accurate index of what his/her weight should be. A BMI of up to 24 is considered healthy. Any number between 25 - 29 means the person is overweight. A reading between 30 - 39 is an indication of obesity, placing the individual at high risk of developing heart disease, high blood pressure, diabetes, and other ailments. A reading of 40+ is an indication of extreme obesity, placing a person at highest risk of health problems.

**BMI Below 25**  
**Healthy Weight**  
*Candidate for BeSlim® Lifestyle and meal replacements for Optimal Health.*

**BMI 25-29**  
**Overweight**  
*At high risk to develop cardiovascular disease, diabetes, etc. Great candidate for the 5 & 1 Plan and BeSlim® Lifestyle.*

**BMI 30+**  
**Obese**  
*At higher risk to develop cardiovascular disease, heart disease, diabetes, etc., without intervention. Our 5 & 1 Plan can be lifesaving in helping to lower your weight. You may potentially lower or eliminate many medications such as diabetes, blood pressure, and lipid-lowering drugs. By using our BeSlim® Lifestyle of permanent weight control, you can return to a healthy weight and remain there!*

**BMI 40+**  
**Extremely Obese**  
*At highest risk to develop cardiovascular disease, heart disease, diabetes, etc., without intervention.*
